

High-Power, Durable, Portable Ozone Generator

Disaster-Restoration-Friendly Ozone Machine

The DR-5 is an extremely-powerful, commercial-grade ozone generator for remediation and disaster restoration work. It produces 5,000 mg/hr from the ambient air, even in less-than-perfect conditions. The powerful dual 120 CFM internal blowers will move ozone through large areas.

Features

- generates high ozone concentrations
- High-Power Blower
- Low Maintenance Design
- Vent Hose Attachment
- Push-Button Timer
- Power Cord Wrap Handle
- Disaster Restoration Friendly
- Corrosion-Proof Chassis

Product ID: **DR-5**
Stock: **Yes**
Price: **\$1,495.00**

Specifications

Ozone Output	5,000 mg/hr
Air Flow Speed	11.1 MPH
Timer Range	2 hrs - 48 hr or continuous ON/HOLD
Particulate Filters	Yes (one on each side of unit)
Cord Length	8-ft
Pad Clip	Available upon request (no charge)
Power Requirements	115V/60 Hz (220V/50Hz available upon request)
Power Consumption	150 Watts
Dimensions	7.25-in H x 17-in L x 6-in W
Weight	11 lbs (5 kg)

Disaster Restoration Friendly

The new DR-5 Ozone Generator is designed with the disaster restoration professional in mind. Lab tested to produce several times more ozone than other common portable ozone generators, its portability, durability, and minimal maintenance requirements make the DR-5 the ideal ozone generator for disaster restoration.

Thoughtful Design

DR-5 Ozone Generator

External View

The DR series ozone generators were thoughtfully designed to be the perfect class of ozone machines for disaster restoration and remediation purposes.

Vent Hose Attachment

Thanks to the vent hose attachment, ozone can be produced from an outside air source and piped through an inexpensive vent hose to the contaminated area. This technique is important to use when the treatment area ambient air quality is very poor and not suitable for producing ozone.
