

Moisture Indicator

Moisture Indicator

Low Cost Moisture Indicator will quickly display the quality of process air used by the Ozone Generator

Features

- Indicates Moisture in Process Air
- Changes color to show air quality
- Quick visual indicator of air quality
- Changes from blue to white when air is wet

Product ID: M1 Moisture Indicator Stock: Yes Price: \$35.00
--

Specifications

Uses These handy air quality indicators are used between Air Dryers or Oxygen Concentrators and the Ozone Generator to give a good visual indication of the quality of the process air entering your Ozone Generator

COLOR INDICATED	DEFINITION OF COLOR
Bright Blue	Air is below -40-deg C Dew Point
Light Blue to Purple	Air is above -40-deg C Dew Point
White	Air is at or above 0-deg C Dew Point
Black	Contaminated by high Ozone levels
Yellow	Contaminated by Oil Vapors
Red/Pink	Contaminated by Acid Vapors
Green	Also a result of Acid Vapors
	As all of these contaminations in the air may destroy Air Dryers, Oxygen Concentrators, Ozone Generators, and other sensitive equipment this indicator can have a variety of uses.

Flow Rate	0-60 LPM flow rate with less than 2 PSI pressure drop
Max Pressure	30 PSI
Connections	1/4-in Barbed Connections
Dimensions	6 x 1-in (LxW) 15 x 3-cm
Weight:	4 oz (113-g)
Warranty:	[link url="http://www.ozonesolutions.com/Limited_Warranty.html"]1 year[/link]

Color Examples

Here is an example of the colors the M1 Moisture indicator can change to. See the Specifications to see what each color means

Dry vs Wet Air

This picture illustrates the color differences between dry and wet process air.
