

Remote Ozone Monitor Adapter

remote ozone monitoring

The Remote Sensor Head Adapter Kit is designed to allow the sensor head to be located up to 14 meters away from the S-300 or S-500 Ozone Monitor.

Features

- Ergonomically designed
- Interfaces with Series 200, 300 and 500
- Simple plug & play solution
- up to 45-ft of distance between display & sensor

Product ID: **R-10**

Stock: **Yes**

Price: **\$135.00**

Specifications

Enclosure Rating	IP20 & NEMA 1 Equivalent
Remote Cable	
Type	Standard Cat 5 (not cross over)
Connector	RJ45
Standard Cable Length	6.5-ft (2m)
Maximum Cable Length	46-ft (14m)
Enclosure Size (with sensor head)	2.5-in High x 5.125-in Diameter (6.4 x13.0 cm)
Weight	1-lb (0.4 kg)
Warranty	1 yr

R-10 and S-500

The R-10 Sensor is left in the room being ozonated, while the monitor can be read outside the room being ozonated, for Health/Safety purposes. This is also a way to monitor the amount of ozone being produced for the odor removing process.

R-10 attached to an S-500 via a 6-ft cable. Allows easy monitoring of ozone in a chamber or test room.

R-10 Connected to Sensor

The R-10 adapter plugs into the Aeroqual base; a cable connects the base to the remote sensor head. Up to 45-ft (15m) of cable can separate the sensor head from the display.
