

UV Aqueous Ozone Destruct Unit

6 GPM Ozone Destruct Unit

UV ozone destruct unit removes dissolved ozone from water streams. Ideal for environments where ozone is off-gassing from water resulting in irritation to employees. Easy to install & efficient.

Features

- destroys aqueous ozone instantly
- Simple installation and maintenance. Compact units require minimum space.
- Safe - No danger of overdosing, no addition of chemicals
- Stainless Steel Construction
- Automatic - Provides continuous or intermittent disinfection without special attention or measurement

Product ID: **UV-S23A**
Lead Time: **1 week**
Price: **\$995.00**

Specifications

Capacity	6 GPM (180 GPH)
Inlet & Outlet	3/4-in MNPT
Maximum Operating Pressure:	100- PSI
Pressure Drop:	less than 5 PSI at maximum flow
Lamp Replacement Frequency	10,000 hours (14 months of continuous service)
Power	120V/60Hz
Power Consumption:	24 Watts
Dimensions:	26x8x5-in (LxWxH)
Weight:	14-lbs (6.5 kg)
