

Have you been looking for a complete turnkey ozone system for your remediation project?

Introducing the OS-150 Ozone System

The OS-150 Ozone Systems are as simple as it gets, provide power to the unit and connect ozone output lines!

Trailer mount systems are also available!

Features:

- Weatherproof enclosure
- Modular – allows for easy expansion
- Minimal maintenance
- Customizable to your specifications
- Easy to use well timing system
- Rental systems are available
- Remote monitoring and control are possible

OS-150 on-site in Alabama

The OS-150 is customizable to your exact requirements!

Operation data is logged to a USB memory stick!

HMI Panel allows for easy system operation.

MAIN SCREEN - SCREEN 1			JOG VALVE
SYSTEM	AIR COMPRESSORS OFF		O3 GEN
Off On	O2 CONCENTRATOR OFF		Off Auto

Well selection and timing is done using a touch screen panel

Specifications:

- Ozone Output: 40 g/hr (2.1 lb/day) Ozone
- Oxygen Output: 10 LPM @ 93% Purity
- Delivery Pressure: 25 PSI Standard (up to 50 PSI optional)
- Output Connection: 3/8 – inch Female NPT
- Ozone Concentration: Up to 5%
- Total Flow Rate: Up to 5 CFM
- Telemetry: Uses Ethernet connection
- Electrical power: 220 Volt, 20 Amps
- Dimensions: 36-in wide x 60-in tall x 24-in deep

Ozone is Generated using the durable TG-40 ozone generator at up to 50 PSI!

No re-pressurization of the ozone is needed! No extra booster pumps are required, this means less ozone loss, and more ozone in the ground!
