

To simplify the installation process of your Aeroqual Series 500 Monitor software on computers with Windows Vista or Windows 7, Ozone Solutions has created this supplemental...

Data Logging Software Quick Install Guide

for Microsoft Windows Vista and Windows 7

A Few Notes:

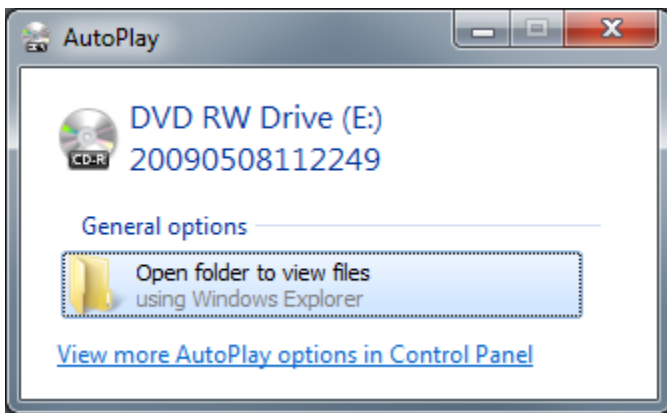

This guide is written for computers that have Windows Vista or Windows 7 installed with a common configuration. If your computer has an unusual configuration, some steps may vary. If you have problems please contact Aeroqual or Ozone Solutions for assistance.

Unfortunately, Aeroqual does not include a standard installer for Vista or 7 on the CD. This guide will help you through the process of manually copying files from a compressed archive on the CD to your computer.

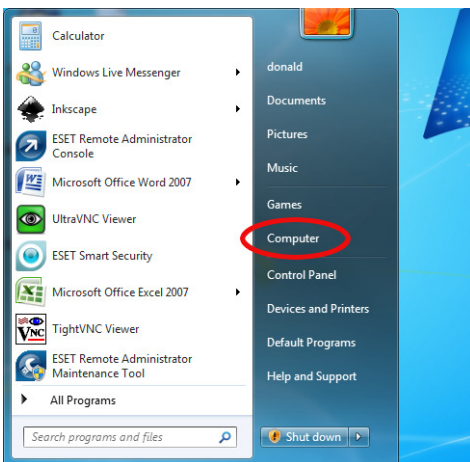

Step 1: Insert the CD

Insert the CD pictured on the cover of this guide.

On most computers, shortly after you insert the CD, an AutoPlay dialog will appear. Close the dialog by left-clicking the red X button on the top-right corner of the dialog.

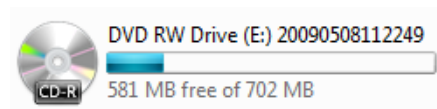

Step 2: Locate the Files

Click the Start button (typically found in the lower-left corner of your screen) and left-click "Computer".

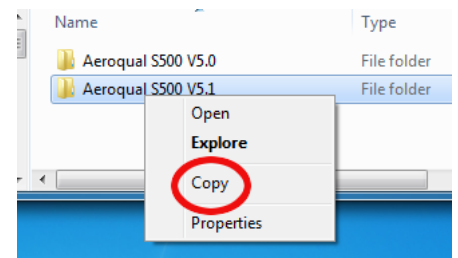

In the window that appears, find your CD or DVD drive icon and double-click on it.

Double-click the following icons in order as they appear: Series 500 CD

V5.1 -> Software for Windows Vista -> Aeroqual S500 V5.1 for Vista(.zip).

Right-click on Aeroqual S500 V5.1 and select "Copy".

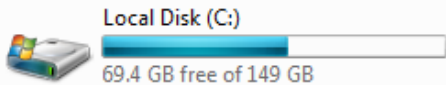

Close the window by left-clicking the red X in the top-right corner of the window.

Step 3: Copy the Files

Click the Start button (typically found in the lower-left corner of your screen) and left-click "Computer".

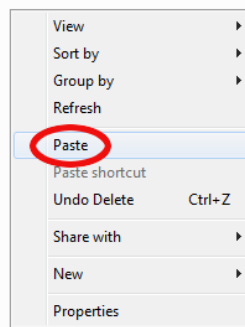

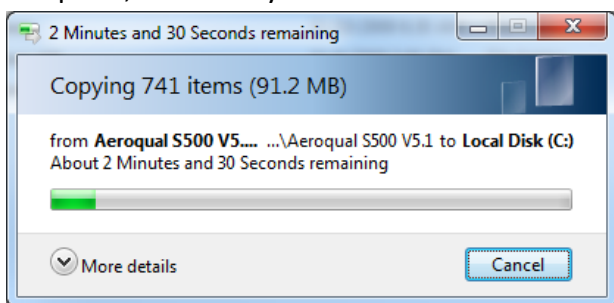

Hard Disk Drives (1)

In the window that appears, find your computer's hard drive and double-click on it.

In the white space below the list of files and folders, right-click and select paste.

A copying dialog will appear. Wait for the copying process to complete, which may take a few minutes.

Step 4: Create the Shortcut

Once the copying process is complete, double-click the newly created "Aeroqual S500 V5.1" folder.

Right-click on the "Aeroqual S500 V5.1(.exe)" Application file and select "Send To" -> "Desktop (Create Shortcut)".

An icon for the Aeroqual software will appear on your desktop. You can double-click this icon at any time to use the software. Please keep the CD in a safe place in case you ever need to reinstall.
