

How is ozone made in Nature?

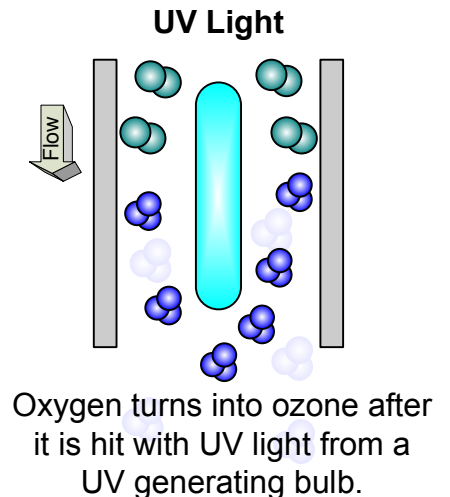

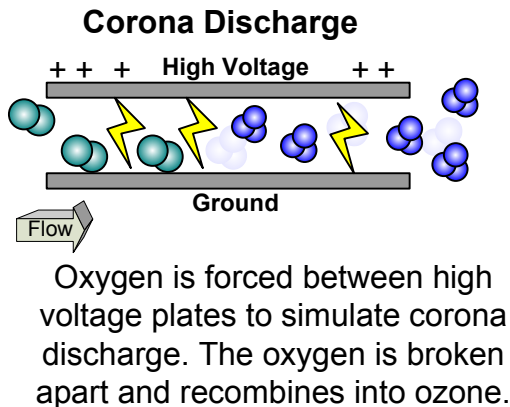

2 Methods

Both methods have enough energy to split oxygen molecules.

How is ozone made by Ozone Generators?

Same 2 Methods

Advantages of Corona Discharge

- High ozone concentrations
- Best for water applications
- Fast organic (odor) removal
- Equipment can last for years without maintenance

Advantages of UV Light

- Simple construction
- Lower cost than corona discharge
- Output hardly affected by humidity
- Less by-products vs. corona discharge
